

Reliable earthworks. Controlled execution.

English-speaking site management

Foremen ready to work directly with international project teams.

Certified operations

ISO 9001, ISO 14001 and RALA-qualified. Part of certified Pylon Group.

Modern heavy equipment

3D-equipped excavators, dozers, dumpers, loaders and compaction equipment.

What we deliver

Enabling & site preparation

Clearing, excavation, earthworks, temporary routes and site logistics areas.

Foundations & structural earthworks

Subgrades, filling, compaction and preparation for foundations and slabs.

Roads, yards & logistics

Internal roads, parking, heavy traffic areas and final surface structures.

Utilities & drainage

Stormwater, drainage, trenches, chambers and civil interfaces for utility networks.

Environmental works

Stormwater structures, soil improvement and remediation-related civil works.

Rock excavation & mass handling

Excavation, rock works coordination, hauling, reuse and replacement of masses.

Why Pylon Infra

+35

Decades of construction experience

Pylon has operated in construction for more than 30 years, combining site expertise with group-level resources.

EN

English-speaking foremen

Our site management can coordinate daily production, safety, reporting and interfaces in English.

Q

Qualified & certified professionals

Experienced personnel with the qualifications required for demanding construction and site environments.

- ISO 9001 - Quality
- ISO 14001 - Environment
- RALA Qualified

3D

Efficient production capability

Modern Stage IV/V machinery and 3D machine control support productivity, accuracy and lower emissions.

360

Strong interface capability

Through Pylon Group, we understand the interfaces between civil, building and MEP works.

Cost control

Production-driven planning and transparent follow-up.

Schedule control

Resourcing aligned with critical milestones.

Safety & quality

Structured methods, documentation and qualified personnel.

Fast mobilisation

Flexible organization and broad equipment access.

A civil partner that stays on top of cost, schedule and production

We combine the agility of a focused contractor with the resources and quality systems of an established Finnish construction group. Our goal is predictable execution, clear communication and a site that keeps moving.
